Education

University of Baguio

Information and Communication Technology

University of Baguio

Bachelor of Science in Computer Science

Relevant Projects

University

Real Estate Web Platform using Supabase and Next.js

Tech stack: Next.js, Tailwind CSS and Supabase

- Created a web application that helps workers and university students find a suitable apartment, condominium and dormitory.
- Focused on UI/UX development and backend integrations to ensure user-friendly workflows.

Dental Clinic Appointment Booking System

Tech stack: SERN (MySQL, Express.js, React.js, and Node.js)

- Created CRUD functionalities for appointment scheduling and schedule management.
- Worked on the UI design using Tailwind CSS and React.js.
- Utilized React.js to retrieve and display data from a MySQL database.

Assignment To-do List Mobile Application

Tech stack: React Native, Expo and Firebase

- Created a mobile application that allows users manage their assignments.
- Added a function to notify the user when an assignment is approaching its due date or is overdue.

Traffic Monitoring System for Baguio City

Tech stack: PHP, Laravel, JS, Vue, MySQL, MapBox, WebSockets

Smart City Command Center | On-the-Job Training (OJT)

- Engineered a **real-time traffic monitoring system** with dual interfaces:
 - **Public dashboard:** Live traffic visualization of key roads with color-coded status indicators
 - **Admin page:** Instant CRUD operations (add/edit/soft-delete roads) with changes propagating in real-time to all users
- Implemented **real-time features:**
 - WebSocket integration for live traffic updates without page refresh
 - Synchronized MapBox displays showing current congestion levels
- Developed **role-based real-time routing:**
 - Automatic redirect from landing page to admin portal on login
 - Live permission verification for all data modifications
- Optimized data pipeline:
 - Reduced traffic data latency through WebSocket implementation
 - Soft-delete functionality with real-time UI updates
- Enhanced UX with:
 - Interactive sidebar with live road status indicators
 - Instant map style toggling
 - Real-time search filtering for roads/intersections

Personal

Manage a Grocery Store

- Designed and created a LAN network to connect multiple devices.
 - Enhanced customer interaction and workflow efficiency through digital tools and real-time communication.
-

Skills

Communication: Written and Verbal Communication, Verbal Communication Skills

Critical Thinking: Problem-Solving

Programming & IT: Object-Oriented Programming (OOP), Basic Programming, Computer Science, Information Technology, MIS

Frontend: React.js, Tailwind CSS

Backend: PHP, Node.js

Database: MySQL, Firebase, Supabase

Tools: VSCode, XAMPP, Figma, ChatGPT
